ALWAYS READY, ALWAYS THERE

NO LIMITS TO A SOLDIER'S SUCCESS

The Army National Guard provides its members with countless training and schooling opportunities. Not all require you to attend classes. Correspondence classes and a variety of distance learning courses are made available to assist Soldiers both personally and professionally. Soldiers are given every opportunity to grow — especially when it comes to their career.

ARMY NATIONAL GUARD

ENGINEER
BUILDING ANYTHING AND EVERYTHING

1-800-GO-GUARD ★ nationalguard.com

NOTHING STANDS IN THE WAY OF AN ENGINEER

Engineers in the Army National Guard support the safety and protection of civilians across the nation. They receive training beyond the scope of traditional civil engineers and become experts in mobility and countermobility operations.

ENGINEER OVERVIEW

Engineers build anything and everything the Army National Guard needs. From surveying and bulldozing to framing and wiring, engineers take on construction and demolition projects of any size—from start to finish. These experts pave roads and build fortifications for use by Soldiers. In combat, engineers use their skills to shape the battlefield, destroy obstacles and open routes for troop movement.

Army National Guard engineers also work around the globe to assist countries in need of hospitals, schools and running water. Stateside, these problem solvers are pivotal responders during natural disasters, as they clear roads and restore power to communities.

REACH YOUR FULL POTENTIAL

The Army National Guard strives to assist its Soldiers in living up to their full potential by providing education programs and advanced training.

IN-DEMAND SKILLS

The technical skills you learn as an engineer will help prepare you for a civilian career with building contractors, state highway agencies, rock quarries, well drillers or construction firms. You'll be able to consider a future as an operating engineer, heavy equipment operator, well driller or rigger.

There are a number of formal three-year operating engineer apprenticeship programs which you may qualify for as well. These programs, which are administered by the International Union of Operating Engineers and the Associated General Contractors of America, Inc., consist of at least three years or 6,000 hours of on-the-job training and 144 hours per year of classroom instruction.
